### 12.2 PERSISTENCE AND DEGRADABILITY

The product is not removable from water by biological cleaning process.

### 12.3 BIOACCUMULATIVE POTENTIAL

Does not accumulate in organisms.

### 12.4 MOBILITY IN SOIL

Slightly soluble

#### Ecotoxic effects:

Only by increasing the pH value during application of large quantities.

#### Behaviour in sewage processing plants:

##### Remark:

Ecotoxicological tests with Portland cement on *Daphnia magna* (US EPA, 1994a, see Section 16 References [6]) and *Selenastrum Coli* (US EPA, 1993, see section 16 literature [7]) have shown little toxicological effect. Therefore, the LC50 and EC50 values could not be determined, see section 16 literature [8]. There were also no toxic effects on sediments found, see section 16 literature [9]. The addition of large quantities of cement in water can cause a pH increase and thus can be toxic to aquatic life.
