# EWI Pro Training Academy

## Location

Our dedicated training facility in Luton is easily accessible from the M1 Junction 11A. The academy is situated just a short distance from the motorway.

## Training

All course attendees will be encouraged to participate in hands on training.

Training is delivered by our experienced Technical and Training team and will cover all aspects of External Wall Insulation and Silicone Render systems.

Our facilities have been designed to deliver a training programme that is underpinned by theoretical and practical learning. Participants will be taught in depth about External Wall Insulation and Render only systems

---

## About The Course

Course length will either be a half day (9am - 12.30pm) or full day (9am - 3pm) and will depend on which course you choose to attend.

Full day courses will comprise of an in-depth theoretical presentation followed by hands on practical training using a range of products.

Half day courses will comprise of a short presentation followed by practical training.

### **Please note:**

- All courses are delivered in English. Please contact us beforehand for any special requirements you may have.
- All tools and equipment needed for the course will be supplied and are available to purchase upon completion.

# Course Guide

## Introduction to External Wall Insulation (EWI)

This course is aimed at anyone wishing to gain knowledge of our EWI systems. No experience necessary.

**Duration: 1 Day**

---

## Introduction to Render only systems.

This course is aimed at anyone wishing to gain knowledge of our different render only systems applied to block, brick and render carrier board. No experience necessary.

**Duration: 1 Day**

---

## Product Familiarisation.

This course is aimed at experienced installers who currently do not use EWIPRO materials. A working knowledge of render systems is required.

**Duration: 1/2 Day or 1 Day**

---

## Advanced Rendering Techniques.

This course is aimed at experienced installers who wish to enhance their knowledge of our products. This programme will teach participants how to deal with problem areas such as below damp course and using some of our decorative finishes such as Mosaic render.

**Duration: 1 Day**

---

## On-site Training.

One member of our technical team will attend your project and carry out training.

**Duration: 1 Day**

---

## Render Spraying Machine Introduction.

This course is intended for experienced installers looking to increase production and move into the commercial sector. This programme covers health and safety, the various components of the spray machine, assembly, operating it, and cleaning up afterwards.

**Duration: 1 Day**

# Course Content

All courses include a classroom-based theory and technical component, followed by practical hands-on training in our purpose-built training area.

All courses will follow a similar structure:

- Introduction to EWIPRO.
- An overview of our systems and guide to installation.
- An overview of EWIPRO products.
- Design consideration.
- Practical Training.
